

# SHEAR GENIUS.

**Big benefits. Small footprint.** The SpinTek Static Test Cell (STC) is a high-shear, high-capacity desktop filtration system that provides valuable time and cost advantages in testing feed streams and membrane filtration viability using small volumes of feed solution, all in an ultra-small footprint.

With our STC you can evaluate both the long-term benefits of the SpinTek process against real industrial fluids, and the economics of SpinTek technology in actual industrial situations. And when you're ready to ramp up, SpinTek is there for you with identical technology on an industrial scale.

- Includes instrumentation, feed pump and sample membrane
- Flow rates up to 20 gpd (76 lpd)\*
- Automatic operation
- Easy-change membrane
- Ultra-small footprint 2 x 2 x 2' (.6 x .6 x .6m)

\*DI water, 50 psig, 75°F, 0.2 micron membrane

  
**SpinTek** *filtration*
